# AERO MODELLING

## WINGS:

*Aero modelling is the activity involving design, development and flying of air craft. It is a very exiting and interesting way to learn, apply and understand science and engineering principles.*

*Generally involvea small sized flying objects like radio Controlled Aircraft (RC AIR craft), gliders, Ornithopters, Boomerangs and paper planes. Although Aeromodelling looks like a lot of Aeronautical engineering topic, it involves a lot of interdisciplinary concepts from various streams of engineering. Aeromodelling gives a good understanding real air craft industry and provides enormous opportunities to develop innovative thinking and implementation*
