"The program is designed to create scientific temper in the kids"

What is Li'l Edison ?

Today's world is full of electronics, right from toy to satellite almost everything is electronics based. Each of these gadgets elicits a curiosity on the child. They want to know how these things work. Li'l Edison is an innovative Science Enrichment Program designed by "Iragu Foundation" especially for school children to build skills in the world of Electronics. It enables children to learn observe, experiment, discover, science & technology practically.

The main objective of the Li'l Edison Program is to create Young Inventors and encourage creative thinking skills in children

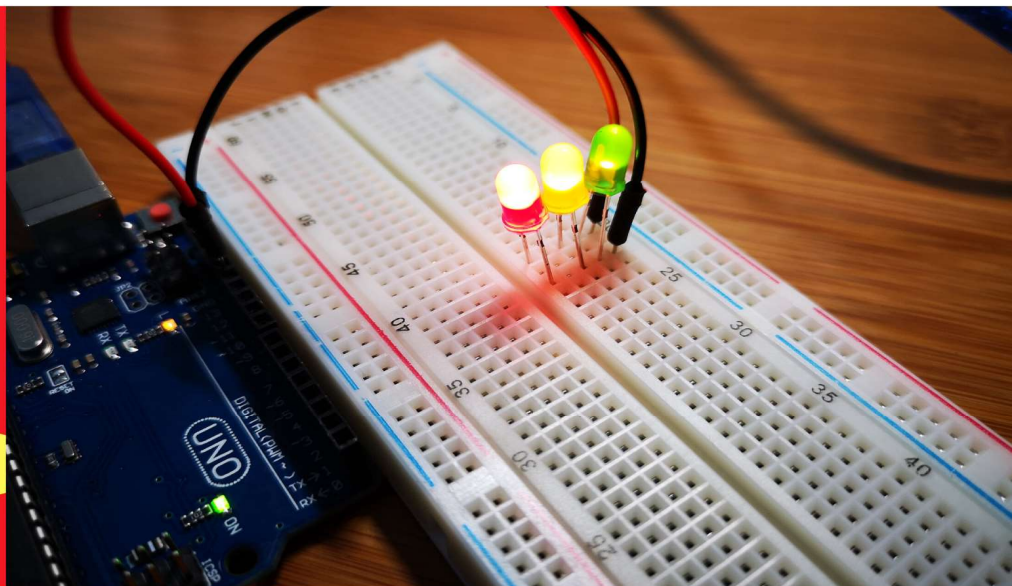

PROGRAM HIGHLIGHTS FEATURES
